Task 1: Personal Information Table

Objective:
Create a webpage that displays personal information using a table.

Instructions:

1.   Title your webpage with a relevant name, like "Personal Info."
2.   Create a main heading (e.g., "My Personal Information").
3.   Use a table to display the following personal details: Name, Age, Email, and Phone Number.
•   The table should have two columns: one for the detail type and one for the actual information.
•   Use anchor links to make your email and phone number clickable.
4.   Add an image of yourself either above or below the table.
5.   Style the table to add spacing and borders for clarity.

Task 2: Education and Experience Table

Objective:
Create a webpage that showcases both your Education and Work Experience using tables.

Instructions:

1.   Add two main sections to your page: one for "Education" and another for "Work Experience."
2.   Under each section, create a table that outlines the following details:
•   For Education: Include columns for Institution, Degree, and Years Attended.
•   For Work Experience: Include columns for Company, Position, and Years of Employment.
3.   Ensure each table has a clear header and uses consistent formatting to distinguish between the categories.
4.   Add line breaks (<br>) and horizontal rules (<hr>) to separate sections for better readability.

Task 3: Travel Destinations Table

Objective:
Create a webpage to showcase your favorite travel destinations using a table format.

Instructions:

1.   Title the page (e.g., "Favorite Travel Destinations").
2.   Add a heading for "Top 5 Travel Destinations."

3.	Create a table with three columns: Destination Name, Country, and Best Time to Visit.

4.	Add an image related to one of the destinations next to or below the table.

5.	Include links to each destination's travel guide (use anchor tags) in the table.

6.	Use list tags (<ul> or <ol>) below the table to highlight specific attractions or activities for each destination.
